BID Loading Bay Equipment

BID Group Ltd specialise in the manufacture, supply, and installation of efficient, reliable loading bays and equipment for warehouse facilities.

Loading bays and associated equipment are key to the efficient and safe handling of goods. Dock levellers, shelters, wheel guides and buffers are essential to make loading and unloading easier to keep your logistics running smoothly and efficiently.

With over 30 years of industry experience, we can advise on every step of your project, from design through to installation, and can provide bespoke solutions for all types of warehouse and distribution facilities.

BID Group can also provide service, maintenance, and repair contracts to ensure regular inspections are undertaken, not only for our own loading bays and equipment but also those you may have purchased from other manufacturers.

BID Loading Bay Equipment

Dock Levellers

Dock Levellers accurately bridge the difference in height and distance between vehicles and the warehouse floor enabling the load to be transferred in a single horizontal movement, reducing loading, and unloading times whilst providing a stable and safe operation. BID Group custom manufacture dock levellers at our site in Bolton and are available with a hinged or telescopic lip, a 6000kg or 10000kg capacity, and are available in standard and made to measure sizes.

Dock Shelters and Seals

Protection from the elements is vital in the transportation of goods. Shelters from BID Group provide a seal between the lorry and warehouse shielding your load and employees from adverse weather conditions. Dock Seals are solid foam filled pads which are compressed by the delivery vehicle entering the dock to eliminate gaps and improve your building's environmental efficiency during the goods transfer process.

Dock Buffers

Buffers/Bumpers are designed with protection in mind. They prevent and reduce impact damage between vehicles and buildings. Heavy duty and hard wearing they are easy to install and require minimal maintenance.

Wheel Guides

Wheel guides ensure vehicles are aligned to the dock and in the correct position for offloading and loading.

Replacement Parts

A full catalogue of replacement loading bay equipment parts are available should your equipment need urgent repairs, keeping downtime to a minimum.

Additional Options

- Combi Control Panels
