Klimate High Speed Doors

More than just speed

BID Group Ltd was established in 1985 as Bolton Industrial Doors with a core business of maintenance and repair of all types of industrial doors.

KLIMATE is our High Speed Door division and one of the UK's leading manufacturers. With over 30 years' experience, KLIMATE is recognised as a specialist in the service and maintenance of all types of High Speed Doors. Whether your business runs from large industrial premises or smaller retail/private sites, there is a High Speed Door in the KLIMATE range to suit every application.

Why choose KLIMATE High Speed Doors?

- Fast Operation
- Energy Efficient
- Temperature Regulation
- Damp/Humidity Control
- Dust & Vermin Control
- Traffic Control
- Sound Reduction
- Secondary Security
- UK Manufactured
- UK Parts Stock
- Health & Safety Standard
- Bespoke design

Ardent Standard

Fast Acting and Energy Efficient High Speed Doors intended for use in external locations with high usage and where reliability is key.

Ardent Oversize

High Speed Doors designed with wind load resistance for larger than usual access points, durable and energy efficient with minimum maintenance.

Ardent Stainless

A Fast and Efficient High Speed Door, designed for premises with high hygiene requirements such as the food industry.

Ardent Interior

Uniquely designed to suit many different applications. With fast opening and closing speeds, our range of High Speed Interior Doors improve your operational efficiency and save energy.

The KLIMATE K2 High Speed Freezer Door is a versatile, heavy duty, robust door to meet the rigorous demands of working in a freezer environment. The design of the K2 door makes it reliable and simple to maintain and can be installed on either the chilled, ambient or freezer side of the opening.

Features of Klimate High Speed Doors

Canopy
All doors come with a powder coated main canopy. Outdoor motor canopies are available

Motor
3 Phase 400v AC worm gear and brake motor (with anti roll back)
Encoder switches for open and close positions. Adjustable opening and closing speeds
Curtain barrel is driven by motor drive unit eliminating the need for chain drive

PVC Curtain
Wide range of solid colours available with or without vision panel which has good insulation properties, resists air currents and provides a good sound barrier

Wind Bar System
Anodized tubes which run on nylon pulleys travel with the curtain.
Various combinations available depending on wind loadings

Control Panel
Programmed via LED, including inverter technology giving fully adjustable open and closing speeds to suit specific environment
IP55 rated enclosure
LED shows the number of cycles completed
Self diagnostic control panel

Photo-Electric Safety Beam
Two 24v AC photo-electric safety beams fitted providing closing safety device, activated by breaking the beam
IP65 Protection

Damage Limitation Tabs
Replaceable end cassettes on bottom rail to prevent damage to the door and lowers repair costs

Bottom Rail & Electric Safety Edge
Constructed from box section steel for high impact resistance
Wireless resistive safety edge forming the door seal
Touch sensitive fail safe safety edge
